

Refugees Country Briefing

Ethiopia

This document was developed in the framework of the EU-funded project “Refugees and Recognition – REACT” by the ENIC-NARIC centres of Norway, Italy, the Netherlands, Ireland and the Germany.

The European Commission support for the production of this publication does not constitute an endorsement of the contents, which reflects the views only of the authors, and the Commission cannot be held responsible for any use, which may be made of the information contained therein.

This country briefing – especially developed to help with the evaluation of credentials of refugees, displaced persons and persons in a refugee-like situation – should give orientation on the education system in Ethiopia in the light of recent political and economic developments in this country. It presents a systematised overview on its higher education system and links to the available information sources that are useful for the evaluation of qualifications of refugees coming from Ethiopia, even in cases where candidates present insufficient or lack of documentation.

1. Current situation

In October 2016, a state of emergency was imposed after a great extent of protest in the states of Oromia and Amhara. Several thousands of protesters were arrested, but the protests raised again, when the state of emergency was lifted in August 2017. The Ethiopian prime minister resigned in February 2018, and a new state of emergency was imposed for six months. A new prime minister, who is an Oromo and a reformist, was in April 2018 sworn in. He has declared that he wants reconciliation and dialogue with all parties in Ethiopia. However, there is still uncertainty linked to the political development and, how this possibly might affect the educational system in Ethiopia.

In 2003, the Ethiopian education system went through a major reform. The Ethiopian Higher Education Entrance Examination (EHEEE) replaced the Ethiopian School Leaving Certificate (ESLC). The introduction of 3-years long Bachelor Degree's, was a short-lived reform, and lasted only until 2006/2007.

In 2011/2012 the education system went through a smaller reform that defined the type of degrees the various education institutions could offer. Private HEI's lost the right to offer degree's in law.

2. Education chart

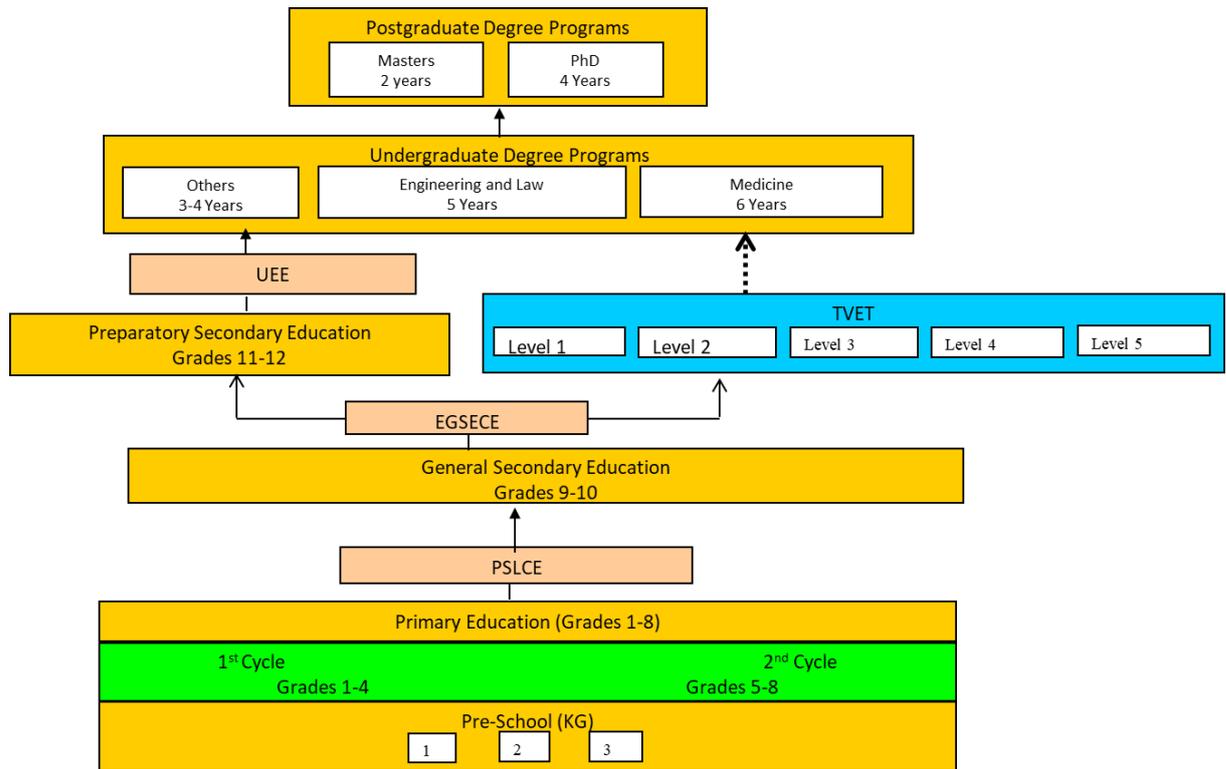

Figure: The New Education System (Source: MoE, 2012/13)

Note: PSLCE=Primary School Leaving Certificate Examination; EGSECE = Ethiopian General Secondary Education Certificate Examination; UEE= University Entrance Examination

Primary and Secondary Education

The Ethiopian Ministry of Education oversees both primary and secondary education in the country. Primary education is mandatory, but enrollment, teacher-to-pupil density and other systemic factors mean that children in rural areas end up with far fewer resources than those in the cities. These differences carry over into junior secondary (9-10 grade) and finally into Preparatory School. Only about 12% of the relevant age group enters grade 12, and only about 68% of secondary schools had access to electricity in 2016.

- Primary School grades 1-8, age level 7 to 14
- General Secondary School grades 9-10, age level 15 to 16. At the end of grade 10 pupils sit for the Ethiopian General School Leaving Certificate Examination (EGSLCE)
- Preparatory Secondary School grades 11-12, age level 17 to 18. At the end of grade 12 pupils sit for the Ethiopian Higher Education Entrance Examination (EHEEE)

Technical and vocational qualifications (TVET)

- Official name: Levels 1-2 «education», 3-4 «diploma», level 5 is «attestation» or «Certificate» (Level I, II, III, IV and V)
- Access requirements and duration:
- TVET Level 1 education - one year (requiring the Ethiopian General Secondary Education Certificate (EGSEC) - grade 10 for entry)
- TVET Level 2 education - two years (requiring the EGSEC for admission)
- TVET Level 3 Diploma - three years (requiring the EGSEC for admission)
- TVET Level 4 Diploma - three years (requiring the EGSEC for admission)
- TVET Level 5 education– one to three years (requiring either level 3/4 or EUVEC)
- Access to further studies: Each level gives possibility of access to next level TVET. With 2-year work experience (and some CoC testing) admission to HE is said to be possible for Level 5

Higher Education

Higher Education in Ethiopia has gone through a massification in the last 10-15 years, with the number of institutions growing from a handful of public institutions to around 50 today. In the Private sector, almost 100 institutions offer undergraduate and graduate degrees. Due to the pressure on institutions to admit students almost half of all undergraduate students in the country are enrolled in non-full time classes. Admission to institutions and degrees are done by the Ministry of Education, not on the wishes of the student. Restrictions are in place as to what degrees can be offered in private institutions.

- Language of instruction is English in all Ethiopian Higher Education Institutions.
- Diploma programs (2-3 years). Before the reform in 2003/2004, diploma programs were considered higher education. After the admission year of 2003/2004, diploma programs were no longer considered higher education
- Bachelor's Degree (3-4 years*)
- Speciality degrees (Law, Engineering, Dentistry, Medicine etc.) are 5-6 years
- Master's Degree (2 years)
- Doctor of Philosophy (4 years)

*There are no clear national guidelines for what degree should have 3 or 4 years' duration.

3. Education institutions

- List over public universities: <http://www.neaea.gov.et/university/>
- List over non-government HEI's: www.herqa.edu.et - if page is down, use <http://archive.org> and the waybackmachine for access to previous information: <https://web.archive.org/web/20180808153115/http://herqa.edu.et/>

 - Ministry of Education for public higher educations: <http://www.moe.gov.et/>
 - The Higher Education Relevance and Quality Agency (HERQA) for private institutions: www.herqa.edu.et

Please note that web links are not always working properly

4. Certification

- Diplomas and transcripts are issued in English
- Transcripts are not considered to be official unless they are signed and stamped by the educational institution
- The norm is that a Temporary Certificate of Graduation is given immediately upon graduation. The final degree certificate may take as much as two years to be issued
- The principal calendar used in Ethiopia is the Ethiopian calendar (EC). The New Year starts around September 11th or 12th in the Gregorian calendar (GC), and there is a gap of 7-8 years between the two calendars. Year 2000 EC = year 2007 GC. Dates in education documents sometimes follow EC and sometimes GC
- 15-20 credit hours per semester is the norm if enrolled in a day-time degree course. 9-12 credits per semester if enrolled in a part-time degree program
- Grading system:
 - A = Excellent
 - B = Good
 - C = Satisfactory
 - D = Unsatisfactory
 - F = Fail

6. Evaluation tips and recommendations

It is recommended to have transcripts and certificates sent directly from the HEI to the institution who is validating the documents. The Ethiopian authorities distinguishes between official copies and student copies. The transcripts or official student record bears the annotation “Not valid if transcripts is handled by applicant/student”. A document stamped “Student copy” is not an official copy, and has not been sent directly from the HEI.

If the applicant cannot comply with the requirement of asking his/hers HEI to send documents directly to the evaluating institution, a good example of best practice could be NOKUT’s interview-based evaluation method <https://www.nokut.no/en/foreign-education/Recognition-Procedure-for-Persons-without-Verifiable-Documentation/>

- In the case of missing documents which extra documents can be asked for?
Transcripts are usually easy to get. Note that non-payment in cost-sharing scheme might hinder issuance of documentation. Student cards/registration
- English is the medium of instruction in secondary schools and in higher education
- Ethiopian naming system: Own given name + father’s given name + grandfather’s given name
- Grandfather’s given name is taken as the family’s surname
- Ethiopian (Geez) calendar differs from the Gregorian calendar in two significant ways; New Years is in early September, and there is a 7-8 year difference (it is now 2011 in Ethiopia)
- Calendar converter: <https://www.funaba.org/cc>
- Links to good practices: <http://eurorecognition.eu/manual/>
- Suspicion of fake documents: Attempt verification directly with the institutional registrar
