

Welcome to Studiebarometeret for vocational school students!

Choose language below.

Thank you for voicing your opinion about your study programme. Your answers can help improve the quality of your programme!

Your vocational school has informed us that you are a student at:

How should you answer the questionnaire, now that vocational schools are closed due to the corona crisis?

In this survey you will first get a few questions concerning your situation as a student during the corona crisis. For the remainder of the questionnaire, however, we ask that you answer the questions according to how things were before the crisis. When answering, it is important that you consider the entirety of your study programme up to the point where the school was closed, not just parts of it.

To participate, start the questionnaire at the bottom of the page.

The purpose of the survey

Our goal is to capture vocational school students' view on the quality of their education, and to make this information available to students, applicants, the media and vocational schools. The results will be published online on www.studiebarometeret.no/eng. Here you can compare average scores across study programmes, provided that a sufficient amount of students in each study programme have completed the survey. The results from the survey will also be used for research purposes.

Why are you being asked to participate?

The survey is sent to all of the approximately 16000 vocational school students in Norway who have studied for at least one semester, and to some vocational school students in their first semester of study. The information identifying you as a student as well as indirectly identifiable information (study program, gender, age, admission basis, exam results and citizenship) has been retrieved from NSD (The Norwegian Centre for Research Data), who in turn have received this information from your vocational school. Direct personally identifiable information (email address and phone number) has been retrieved from Difis contact database. In addition to this your social security number was retrieved from both data sources, to ensure that we were able to link information from the two sources together. NOKUT has already deleted all data containing students' social security numbers.

What does participation entail for you?

You participate in the survey by filling out an online questionnaire, which takes about 10 minutes to complete. Participation is voluntary. You can take a break while filling out the questionnaire and continue later on; all answers are saved. The survey closes on May 14th. 15 randomly chosen respondents will receive a gift card with a value of either 1000 NOK or 5000 NOK.

Who receives the data?

NOKUT cooperates with your vocational school. The vocational school will get access your anonymous response data, but will not have access to person identifiable information such as your email address, gender or age.

Your personal privacy – how we store and use your personal data

We will process your personal data confidentially and in accordance with data protection legislation. We will not publish data that makes it possible to identify respondents. Rambøll AS assists NOKUT in the implementation and distribution of the survey. They have access to e-mail addresses and telephone numbers until the survey closes.

NSD - the Norwegian Centre for Research Data provides NOKUT with background information on all students, on the legal basis that the survey is in the public's interest, cf. General Data Protection Regulation art. 6 nr. 1 letter e and the Norwegian privacy law § 8. This also applies to those who do not respond to the survey. We do this to be able to investigate whether the answers we receive are representative of the student population, which is very important in order to interpret the survey results. It is possible to opt out of this by sending an e-mail to res-studiebarometeret@nokut.no. Information about you will then be deleted as soon as possible.

What will happen to your personal data at the end of the project?

Records on directly personally identifiable information (phone number and e-mail address) will be deleted by NOKUT no later than October 1st 2020, unless you actively consent to us keeping this information for follow up surveys until December 31st 2021. Records on indirect person identifiable information such as gender, age and nationality will be kept by NOKUT until 2025 and by the NSD Archives at the Norwegian Centre for Research Data until the end of 2030, and will be available for analysis and research purposes, provided that you consent to this at the end of the questionnaire. If you do not consent to your response data being linked with your background data, your response data will be stored without personal information until the end of 2030. The data stored at NSD Archives may be shared with researchers at Norwegian institutions for research purposes, in accordance with data protection laws and on the basis of an agreement with the Norwegian Centre for Research Data.

Your rights

As long as you can be identified in the collected data, you have the right to:

- access the personal data about you that is being processed
- request that your personal data be deleted
- request that incorrect personal data about you is corrected/rectified
- receive a copy of your personal data (data portability), and
- send a complaint to the Data Protection Officer or The Norwegian Data Protection Authority regarding the processing of your personal data

What gives us permission to process your personal data?

We will process your personal data based on your consent. Based on an agreement with NOKUT, NSD – The Norwegian Centre for Research Data AS has assessed that the processing of personal data in this project is in accordance with data protection laws.

Where can you find out more?

If you have questions about the study, please contact:

- The project group at fagskoleundersokelsen@nokut.no
